CS433/CS603 Kaggle Study Assignment

https://www.kaggle.com/startupsci/titanic-data-science-solutions

In this assignment, you and your group(group size should be between five to eight) are required to study the titanic Kaggle example from the above link. For "Model, predict and solve" section, you are only required to study the "Logistic Regression" part and the remaining parts are excluded. After your study, prepare a powerpoint presentation of ten minutes long to present your group's key take-aways from the study. Record your group presentation and post it to the forum of this unit.
